

# X-HS DKH DATA SHEET

Suspended ceiling fastener

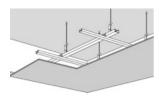

# X-HS DKH Hybrid ceiling hanger

Product info	
Product description	
Designation	Features
X-HS DKH	<ul> <li>Enhanced load capacity due to deep embedment</li> <li>Suitable for use on hard or tough concrete, e.g. renovation jobs on older concrete.</li> <li>With the DX Hybrid technique – fastenings are driven into a small pre-drilled hole, increasing the stick rate to almost 100% while protecting the base material from spalling.</li> <li>Peace of mind – European Technical Assessment (ETA). approved system for suspended ceilings.</li> <li>Suitable for threaded rod ceiling hangers.</li> </ul>

- Allowable ceilings weights are calculated based on a maximum recommended hanger load of 0.4 kN.
- The eccentric load introduction into the fastener is already considered in these load values.
- Fastening of redundant non-structural components (details see ETA-22/0587).

#### Stick rate estimation

_	Designation	Soft/standard	Tough
		concrete	concrete
	X-HS DKH	100 %	100 %

- The stick rate indicates the percentage of nails that were driven correctly to carry a load.
- Stick rate can vary from the above values depending on job site conditions.
